DETAILED ACTION

1. The amendment filed on 4/17/2009 has been fully considered and made of record.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1, 3, 6, 9, and 11-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Kobayashi (US6601289).

4. **Regarding claims 1, 3, 6, 9, and 11-14**, see the Office Action mailed on 1/22/2009. The arguments still apply. Further, with respect to the newly added limitations, it should be noted that Kobayashi still anticipates the claims. In particular, the limitation "substantially constant temperature" appears to be met as long as the temperature of said wire is between 80 degrees and 300 degrees. Also see the *Response to Arguments* below.

5. **Regarding claims 15 and 16**, the time interval of 3 days falls within the time interval of 100 hours (see Table 1, last entry).

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi.

8. Applicant has provided evidence in this file showing that the invention was owned by, or subject to an obligation of assignment to, the same entity as Kobayashi at the time this invention was made, or was subject to a joint research agreement at the time this invention was made. However, Kobayashi additionally qualifies as prior art under another subsection of 35 U.S.C. 102, and therefore, is not disqualified as prior art under 35 U.S.C. 103(c).

9. Applicant may overcome the applied art either by a showing under 37 CFR 1.132 that the invention disclosed therein was derived from the invention of this application, and is therefore, not the invention "by another," or by antedating the applied art under 37 CFR 1.131.

10. The rejection is therefore maintained. See the Office Action mailed on 1/22/2009.

Response to Arguments

11. Applicant's arguments filed 4/13/2009 have been fully considered but they are not persuasive. In particular, Applicants argue Kobayashi does not disclose the newly added limitation of maintaining the temperature of said wire at a substantially constant temperature.

12. The Examiner respectfully disagrees. The term "substantially constant" is broad, in that it does not set forth how large a variation in temperature is acceptable. Moreover, in the last embodiment shown in Table 1, the temperature changes very slowly, i.e. 2 degrees per hour, which can certainly be considered substantially constant, because the temperature does not fluctuate rapidly. Therefore, Kobayashi discloses maintaining

the temperature of said wire substantially constant within the range of 100 to 300 degrees.

Conclusion

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
